Experience

2019-Current	<p>Sr. Big Data Support Engineer. Google Cloud Platform. Providing support to customers using Cloud Platform products, solutions and APIs, including Big Data, and related services. Identify and document product bugs and feature requests and work with internal support teams as well as customers to implement effective solutions. I work closely with internal support teams to improve cloud products at a senior level. Working with Big Data technology (Hadoop, MapReduce, HDFS). Writing code using programming languages as Java and Python. Working with NoSQL databases and big data querying tools like Pig, Hive, Impala. Developing solutions by using Big Data tools like Apache Beam (Cloud Dataflow) and Apache Airflow (Cloud Composer). Making technical interviews for new candidates. Creating webinars at global scale to help Epamers to obtain the Google Cloud Data Engineer certification. Participating as a Big Data committee expert, evaluating Epamers in assessment processes to get promotions inside the company.</p>	EPAM Systems
2018-2019	<p>Oracle Developer ESI(Express Scripts). Working on transformation team, developing PL/SQL code to migrate existing systems to new platforms, in this position, I'm getting lots of experience in Java and tools like Kafka and Attunity. Developing PL/SQL. Developing web services using Java EE.</p>	4th Source
