Education

2020–Ongoing	**Universidad Internacional de la Rioja**, *Master Degree in Visual Analytics*.
2006–2013	**Universidad Autónoma Metropolitana**, *Bachelor of Computer Science*.

Experience

April 2019–Ongoing — **Lead Systems Engineer**, EPAM SYSTEMS, INC, Google Cloud Platform Support.
- Provide technical support for Google customers, using GCP products, including Big Data technologies, and related services.
- Identify and document product bugs and feature requests, working with internal support teams and customers to implement efficient solutions to their business.
- I work closely with internal support teams to improve cloud products at senior level.
- Code using programming languages like Python.
- Help customers to develop solutions using Big Data tools like Apache Beam (Dataflow) and Apache Airflow (Composer).
- I'm certified as a technical interviewer inside the company.
- Create webinars at a global scale to help Epamers obtain the Google Cloud Data Engineer certification.
- I participate as a Big Data committee expert, and Cloud Computing committee expert, evaluating EPAMers in their assessment processes to get promotions inside the company.
- I'm a mentor in the *Resource Development* program, helping new hires to get experience in Google Cloud and Big data Technologies.

April 2018–April 2019 — **Oracle Developer**, 4TH SOURCE, Express Scripts.
- I worked as part of the transformation team, developing PL/SQL code to migrate existing systems to new platforms.
